The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 09/341,324	<b>Applicant(s)</b> KOGA ET AL.	
	<b>Examiner</b> JOY K. CONTEE	<b>Art Unit</b> 2617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/13/08 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated Tanigawa et al. (Tanigawa), US 7,305,698.

Regarding claims 1 and 2, Tanigawa discloses a transmitting apparatus, comprising: a plurality of audio channel material supplying means for supplying a plurality of audio broadcast materials of audio digital data; data supplying means for supplying digital data for an audio information screen corresponding to a transmitted audio broadcast, said digital data including interactive GUI data used to generate an

interactive on-screen display to allow interaction between the user and the display;  
download audio data supplying means for supplying download audio data compressed  
in a predetermined compressing format; multiplexing means for multiplexing the audio  
digital data of the plurality of audio broadcasts, the digital data for the audio information  
screen corresponding to the transmitted audio broadcast, and the download audio data  
to form multiplexed data having an audio broadcast component, a digital data  
component for audio information screen, and a download audio data component; and  
transmitting means for transmitting the multiplexed data, such that each of the audio  
broadcast component, the digital data component, and the download audio data  
component is transmitted completely at least twice within a program period (i.e., reads  
on the transmitting unit repeated transmitting)(col. 4,lines 32-64, col. 20,line 31 to col.  
21, line 62 and col. 29, line 40 to col. 30,line 14).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all  
obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 57-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over  
Tanigawa, in view of Glaser, US Pub. No. 2006/027198, previously used.

Regarding claims 57 and 58, Tanigawa discloses the transmitting apparatus and  
method of claim 1, but fails to disclose wherein said audio digital data has a first sound

quality and the download audio data has a second sound quality that is of superior quality to the first sound quality.

In a similar field of endeavor, Glaser discloses wherein said audio digital data has a first sound quality and the download audio data has a second sound quality that is of superior quality to the first sound quality (reads on an audio signal having periods of higher quality playback) (see page 12 [0096-0099]).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Tanigawa to include providing high quality playback or download for the purpose of improving sound quality results (see Glaser page 12 [0099]).

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yoshinobu, US 5,896,555 discloses a multiplex broadcasting of audio-video programs with DTMF signals.
